EXPERIENCE:

SAN FRANCISCO STATE UNIVERSITY

San Francisco, California

Information Technology Consultant Foundation/Career

January 2012-Present

- Creating and maintaining a unix web server for testing possible Library acquisitions such as Drupal and Omeka.
- Creating new pages for the library website using Dreamweaver during the exploratory phase of the new website.

ANDROID DEVELOPMENT

- Served as the team lead for a group of 6 students that created an Android application from the ground up. The application was designed to help the user find a restaurant using the Google Maps API as well as the Yelp API. My primary responsibilities were the SharedPreferences pane as well as the splash screen. Version control was done using GitHub.

WEB APPLICATION

- Created an interactive PHP web application with a team of 4 others. The application was designed to artists to create accounts and upload their artwork Version control was done using SVN.
- Currently maintaining aceraney.com as a React/Redux/MongoDB testing ground and resume site. This website is in a constant state of flux and used as a learning tool.

Technical Tools

- React, Redux, Node.js, MongoDB, Java, HTML, JQuery, PHP, Python, C++, C, HTML, CSS, SQL, MS SQL Server, MySQL, Android, GitHub, SVN and more.
